

Find your ring size.

Two simple methods to try at home.

01 Using a ring that fits you

Choose a ring worn on the same finger and hand. Lay it flat and measure its inside diameter through the centre, excluding the metal. Record the result in millimetres.

You can also compare this ring with the circles on page 2, after checking the print scale.

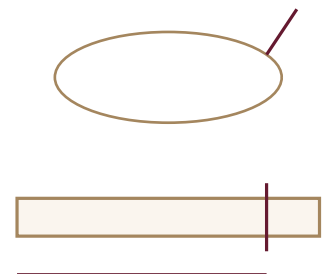

Inside diameter

02 Measuring your finger

Wrap a thin strip of non-stretch paper around the base of your finger. Fit it snugly without squeezing the skin, mark where the ends meet, then unfold it. Measure from the start of the strip to the mark: this is your finger circumference in millimetres.

The ring must also slide over your knuckle. Repeat the measurement to check the result.

Length to the mark

BEFORE YOU CHOOSE

Compare your measurements with the information for the model. Sizing systems can vary: a number alone is not enough to confirm a match.

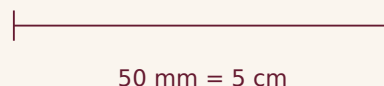

My diameter: _____ mm

My finger circumference: _____ mm

Your guide, at actual size.

A4 • 100% • ACTUAL SIZE

Turn off "Fit to page". Use a ruler to check that the line measures exactly 5 cm. If not, adjust the print settings before measuring.

Place your ring over the circles: the inside edge of the metal must line up with the circle outline. Use the printed sheet, never the on-screen display.

C = inside circumference in mm | Ø = inside diameter in mm

C 46 mm

Ø 14,64 mm

C 48 mm

Ø 15,28 mm

C 50 mm

Ø 15,92 mm

C 52 mm

Ø 16,55 mm

C 54 mm

Ø 17,19 mm

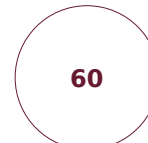

C 56 mm

Ø 17,83 mm

C 58 mm

Ø 18,46 mm

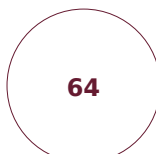

C 60 mm

Ø 19,10 mm

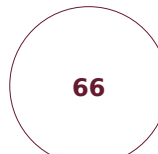

C 62 mm

Ø 19,74 mm

C 64 mm

Ø 20,37 mm

C 66 mm

Ø 21,01 mm

C 68 mm

Ø 21,65 mm

These guides show physical measurements, not the available sizes of each model. If you are unsure, send us your measurement and the ring name.
